

Evaluation target changes the selected SAR flood-map decision

Fixed Sen1Floods11-trained decisions on verified Kuro support; pooled, event-level and cost-ratio objectives are separated.

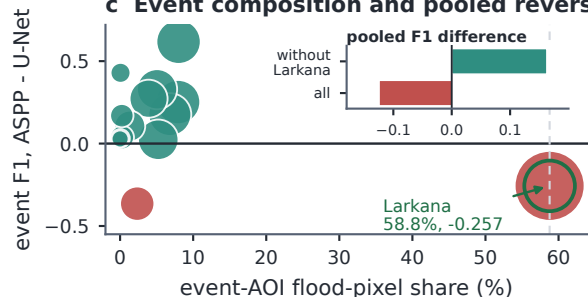

a Evidence support and fixed decisions

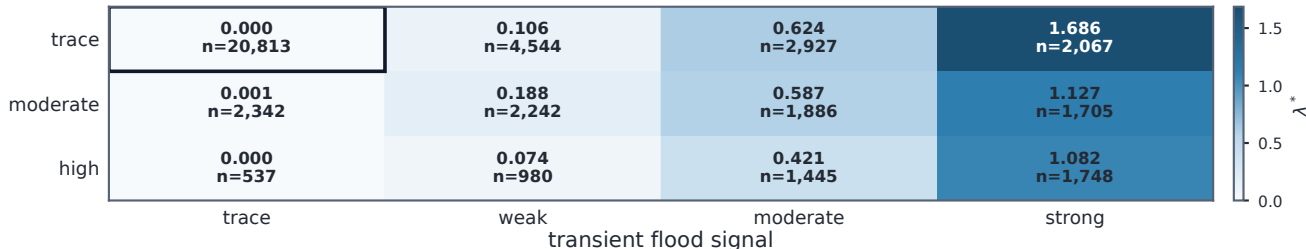

b Evaluation objective changes winner

c Event composition and pooled reversal

d Break-even cost ratio, $\lambda^* = C_{FP}/C_{FN}$

pooled-pixel objective
select U-Net

event-transfer objective
select ASPP

user cost ratio
state-dependent
